

VILLAGE HALL REPRESENTATIVE REPORT FOR FCC MEETING ON WEDNESDAY 12th JUNE 2024

The Village Hall Management Committee meeting took place on Monday 10th June. Minutes will be available at a later date. Main points include:

- The Village Hall does not think that it is practical to install a defibrillator without incurring excessive cost, due to the construction of the walls and the electrical supply modifications required. Their suggestion is that the OSC would be a good alternative
- The upgrading of the heating modifications has now been completed. It will not be until the weather gets colder that the full effects can be properly judged but all signs are positive.
